

# Mergence Equity Prescient Fund (A1)

30 September 2018 - Issued: 15 October 2018

## FUND DESCRIPTION AND SUMMARY OF INVESTMENT MANDATE

Our philosophy of pragmatism underlines our approach to investing in equities, and thus the Fund's objective to be a consistent generator of alpha through cycles. We embrace a style agnostic approach given the cyclical nature of performance of a strong bias to either value or growth styles. Our investment process is based on detailed bottom up fundamental analysis. We aim to invest in high quality businesses that are trading at a discount to our assessment of fair value. Our equity investment process is comprehensive, proprietary research driven and long term focused.

## INVESTMENT OBJECTIVE

The Mergence Equity Prescient Fund is a collective investment scheme that aims to provide investors with capital growth over the long term. The objective is to achieve returns that are in excess of the FTSE/JSE Shareholder Weighted Index (SWIX) over any three-year rolling period, without exposing the Fund to excessive risk.

### RISK INDICATOR

Low Moderate High

## RISK MEASURES SINCE LAUNCH

Risk Stats	Fund	Benchmark
Annualised Deviation	9.56%	10.49%
Information Ratio	-0.19	
Maximum Gain	19.94%	20.58%
Maximum drawdown	-9.76%	-9.19%
Positive Months	63.44%	62.37%
Highest rolling 1-year return	33.15%	31.88%
Lowest rolling 1-year return	-4.33%	-5.04%

## RISK DESCRIPTION

Low - Moderate:

- less volatility than more aggressive mandated portfolios; and
- expected potential long term returns could be lower over the medium to long term.

## WHO SHOULD INVEST

The Fund is suitable for investors who:

- seek specialist South African equity exposure as part of their overall investment strategy;
- believe long term equity exposure adds value;
- understand the nature of equity exposure in that there is a risk of market fluctuations.

30 September 2018 - Issued: 15 October 2018

## DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs(TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
