## INVESTOR PROFILE

### The Fund is suitable for institutional investors:

- who believe that the risk of monetary loss is more important than the risk of underperforming the equity markets
- who seek a real return above inflation independent of the overall equity market returns
- who seek an investment solution with a strong focus on medium term capital preservation, while aiming to produce significant growth over the long term

## INVESTMENT OBJECTIVE

The Fund is managed with the objective of producing a real return of CPI plus 5% per annum over the longer term while preserving capital over rolling 12-month periods. It may underperform relative to overall equity markets due to its focus on capital preservation and long-term capital growth.

## 7-YEAR TRACK RECORD

## INVESTMENT MANDATE

The Fund is managed with an absolute return orientation, and is structured to generate a return of 5% above inflation at a low level of risk. It is broadly diversified across asset classes including equities, listed property, conventional bonds and inflation-linked bonds. The Fund employs active asset allocation and derivative hedging to manage and reduce downside risk.

## RISK OF MONETARY LOSS

The recommended investment term for this Fund is 5 years or longer. While the return expectations should be set at periods over 5 years, the Fund has an objective not to lose money over any rolling 12-month period. As a result, declines over any 36-month period are unlikely. Note that while capital preservation is our intent, this is not a guaranteed fund.
