Minimum Investment	R100 million
Management Fee	Subject to mandate (usually between 0.50% and 1.00% p.a.)
Performance fees	Negotiable

TRACK RECORD

INVESTOR PROFILE

The Fund is suitable for institutional investors:

- who believe that the risk of monetary loss is more important than the risk of underperforming the equity markets
- who seek a real return above inflation independent of the overall equity market returns
- who seek an investment solution with a strong focus on medium term capital preservation, while aiming to produce significant growth over the long term

INVESTMENT MANDATE

The Fund is managed with an absolute return orientation, and is structured to generate a return of 5% above inflation at a low level of risk. It is broadly diversified across asset classes including equities, listed property, conventional bonds and inflation-linked bonds, both domestically and internationally. The Fund employs active asset allocation and derivative hedging to manage and reduce downside risk.

INVESTMENT OBJECTIVE

The Fund is managed with the objective of producing a real return of CPI plus 5% per annum over the longer term while preserving capital over rolling 12-month periods. The inclusion of international assets broadens diversification and should enhance risk adjusted returns. It may underperform relative to overall equity markets due to its focus on capital preservation and long-term capital growth.

RISK OF MONETARY LOSS

The recommended investment term for this Fund is 5 years or longer. While the return expectations should be set at periods over 5 years, the Fund has an objective not to lose money over any rolling 12-month period. As a result, declines over any 36-month period are unlikely. Note that while capital preservation is our intent, this is not a guaranteed fund.

PERFORMANCE DETAILS

Period	Fund	CPI + 5%	ALBI	ALSI
