INVESTMENT OBJECTIVE

The objective of the Mergence ESG Equity Fund is to outperform the JSE Shareholder Weighted Index [SWIX] while investing in companies with better than average Environmental, Social and Governance performance.

The fund is constructed relative to a SWIX benchmark with overweight positions in those stocks that practice good governance, have a low environmental impact and conduct their business in a socially responsible manner.

The ESG performance of the holdings of the fund are monitored through objective measures and management interaction and the overall ESG performance of the fund is monitored versus benchmark to ensure that the fund is delivering on both its financial and ESG objectives.

Our philosophy of pragmatism underlines our approach to investing in equities, and thus the Fund's objective to be a consistent generator of alpha through cycles. We embrace a style agnostic approach given the cyclical nature of the performance of a strong bias to either value or growth styles. Our investment process is based on detailed bottom up fundamental analysis where we dig deeper to understand the quality of business models and management teams. We aim to invest mainly in high quality businesses that are trading at a discount to our assessment of fair value, while taking selective exposure to cheap average quality businesses that have a clear value unlock process. Our equity investment process is comprehensive, proprietary research driven and long term focused.

INVESTOR PROFILE

The Fund is suitable for investors who:

- seek financial return whilst supporting responsible investing that promotes positive ESG practices by listed companies;
- believe long term equity exposure adds value;
- know the nature of equity exposure, in that there is entry risk and the potential of capital loss.
